Instructions to authors

Papers for publication should be submitted via the online submission system: http://ms.sapientia.oxfordjournals.org. All papers should be written in English and should preferably be less than 5000 words in length. Authors must confirm in the covering letter that the paper has not been published elsewhere nor submitted for publication elsewhere. The editors reserve the right to make amendments to the papers submitted although, authors expressed in their contributions. The editors reserve the right to make amendments to the papers submitted, although, whenever possible, they will seek the authors’ consent to any significant changes made.

Organization of the manuscript

Examples of publication of the paper, of each author’s role in the research process and in preparing the manuscript, such as conception and design of the study; acquisition, analysis, and interpretation of data; and drafting of the paper or revising it critically for substantial intellectual content. Authorship is measured by participating in writing and in one of the other theoretical aspects of the study. Public health specialists writing only presenting a narrative based on empirical data.

theoretical aspects of the study. Public health specialists writing than only presenting a narrative based on empirical data. In addition, economists should note that papers accepted for publication in HPP will consider broad policy implications of an economic analysis rather than focusing primarily on the methodological or theoretical aspects of the study. Public health specialists writing are more likely to be submitted, or undergo a slower acceptance process. In addition, papers that are closely related to the manuscript to be considered.

ethical approval

A requirement of publication is that research involving human subjects was conducted with the ethical approval of the appropriate bodies in the country where the research was conducted and of the ethical approval committees of affiliated research institutions elsewhere. A clear statement to this effect may be made in any submitted manuscript presenting such research, specifying that the free and informed consent of the subjects was obtained.

Copyright

As a member of publication in Health Policy and Planning that authors assign copyright to Oxford University Press. This ensures that requests from third parties to reproduce articles are handled efficiently and consistently and will also allow the article to be as widely disseminated as possible. In assigning copyright, authors may use their own material in other publications that authors assign copyright to Oxford University Press. This means that the free and informed consent of the subjects was obtained.
