User fees exemptions alone are not enough to increase indigent use of healthcare services 656
N Atchessi, V Ridde and M-V Zunzunegui

Abstracts in French, Chinese and Spanish (online only)
Health Policy and Planning
The journal on health policy and systems research

Instructions to authors

Papers for publication should be submitted via the online submission system at http://mc.manuscriptcentral.com/heapol. All papers should be written in English and should preferably be less than 5000 words in length. Authors must confirm in the covering letter that the paper has not been published elsewhere nor submitted to another journal. They must also declare, and submit copies of, manuscripts in preparation or submitted elsewhere that are closely related to the manuscript to be considered.

Authors should pay close attention to the factors that will increase the likelihood of acceptance as well as the high quality required for publication in Health Policy and Planning. Authors should address the current relevance of the paper to the journal's agenda and how it contributes to the international debates to which the paper contributes, and to the journal's readership: national and international policy makers, practitioners, public health specialists writing about specific health problems, and researchers working on related theoretical aspects of the study. Public health specialists writing about a spate of a specific public health problem should discuss the relevance of the analyses for the broader health system. Those submitting a paper should think on relevant methods of theory in their analysis, or justify why they have not, rather than only presenting a narrative based on empirical data.

The editors cannot enter into correspondence about papers considered unsuitable for publication and their decision is final. Neither the editors nor the publishers accept responsibility for the views of authors expressed in their contributions. The editors reserve the right to make amendments to the papers submitted although, whenever possible, they will seek the authors' consent to any significant changes made.

Organization of the manuscript

The cover or title page of the manuscript should be submitted. Alternatively, manuscripts can be emailed as Word or Windows attachments (not in Mac format). The title page should contain: Title—please keep as concise as possible and ensure it reflects the substance of the paper.

Corresponding author's name, address, telephone/fax numbers and e-mail address;

Each author's contribution and qualifications;

Keywords and an abbreviated running title.

Authorship

A description is required for publication with the paper, of each author's role in the research process and in preparing the manuscript, such as conception and design of the study; analysis and interpretation of the data; and drafting the paper or revising it critically for substantial intellectual content. Authors' contributions should be stated in writing and in one of the following categories: Signed or emailed approval of the submitted paper; assistance in data collection; participation in any or all of the following activities: data analysis, manuscript writing; and substantial contributions to the conceptualization, design, or administration of the study. All authors must be included on the cover letter and the paper should be submitted by one author on behalf of all authors. Authors must ensure that the paper is included in the list of all authors and that they are correctly named. Authors should notify the editors if any changes occur in the authorship list. The last author should be the corresponding author. The corresponding author will be supplied with online access to the published paper and should ensure that the paper is distributed to the co-authors. The corresponding author should check all drafts, amendments and proofs with the other authors. The corresponding author is responsible for confirming with the co-authors whether they also have a significant contribution to declare and may be required to co-ordinate the completion of written forms from all co-authors where appropriate.

Copyright

A requirement of publication is that research involving human subjects was conducted with the ethical approval of the appropriate bodies in the country where the research was conducted and of the ethical approved committees of affiliated research institutions elsewhere. A clear statement to this effect must be made in any submitted manuscript presenting such research, specifying that the free and informed consent of the subjects was obtained.

Ethical approval

A requirement of publication is that research involving human subjects was conducted with the ethical approval of the appropriate bodies in the country where the research was conducted and of the ethical approved committees of affiliated research institutions elsewhere. A clear statement to this effect must be made in any submitted manuscript presenting such research, specifying that the free and informed consent of the subjects was obtained.

Conflicts of interest

Authors must declare all conflicts of interest during the online submissions process. The lead author is responsible for informing the editors whether they also have any other conflicts to declare and may be required to co-ordinate the completion of written forms from all co-authors where appropriate.

Copyediting

A paper accepted for publication has the right to the title page in normal script. The lead author is responsible for the quality and presentation of the manuscript. The editors may request a hard copy of the submitted paper for checking, correcting and passing all authors. The editors reserve the right to make amendments to the papers submitted although, whenever possible, they will seek the authors' consent to any significant changes made.

Organizations

The editors cannot enter into correspondence about papers considered unsuitable for publication and their decision is final. Neither the editors nor the publishers accept responsibility for the views of authors expressed in their contributions. The editors reserve the right to make amendments to the papers submitted although, whenever possible, they will seek the authors' consent to any significant changes made.
